

Once more, we thank you for your generosity and kindness towards these children. We could accomplish little without your help. We now number 135 children living in our six houses, plus 11 studying in college or university. I look at some of these kids I took back 15 years ago, and they are typical teenagers. Our first girl, Noon, now is a housemother and is taking college courses on the weekend. Other college girls like Ying and Noon Nin come to help with closing the year end books and making the financial reports. Others return to play with the babies and help around the House of Hope when they have free time. Some, of course, graduate and get jobs, and I may not see them again. But it is not about me, it is that I hope they have good lives. It is because of this we are so thankful to you. We pray for you and yours every evening. May the Good Lord grant you all good health, happiness and peace throughout 2014!
